

**Automation
Devices, Inc.**

ADI is an ISO 9001:2008 certified vibratory feeding systems manufacturer

What does that mean?

**ISO certification is a standard for quality management
among businesses across the globe.**

Most other vibratory feeding companies are NOT ISO certified!

Benefits of ISO 9001:2008 certification include:

- **ISO standards are recognized internationally**
- **ISO demands a more efficient business operation**
- **ISO reduces waste and increase productivity**
