

Stock Multipurpose Bowl with Tooling

Orients Many Screws, Rivets Tapered Parts and Others

12" Diameter Tooled Bowl

- An adjustable rail in the bowl's discharge facilitates the orienting of headed parts like screws and rivets with varying shank lengths and diameters.
- Cylindrical parts, with a larger diameter close to one end versus the other, orient reliably in this bowl's "hanging" style tooling.
- Order STOCK tooled bowls, 12 inch or 18 inches in diameter and request a clockwise or counterclockwise spiral track. Options include hardened tooling and wear-resistant linings.

CB372UTB = 12" clockwise tooled bowl

CB373UTB = 12" counterclockwise tooled bowl

- Complete feeding systems include the tooled bowl, a Model 10 10 base unit (120 volt or 240 volt), foot locators and a controller (120 volt or 240 volt).
